DollsVilla Global BV

DollsVilla by Liliane® for the children in the world. To house their most important emotions. The child-height home on wheels for large dolls and toy animals 12" [30cm], and their cars.

Design interior, car ramp, storage drawers. Birch plywood, solid beech, stainless steel.

Dutch design. Made in Germany.

Embassy of Canada The Netherlands

"Liliane is a successful Dutch entrepreneur who has introduced a sustainable, high-quality, fully certified 'DollsVilla' that is mainly used by hospitals, rehabilitation centers and [daycare] homes for children, so that psychologists and psychiatrists can playfully observe children to quickly find out their traumatic experiences. Moreover, this way of working is very child-friendly. If Liliane is successful in Canada after this introductory journey and all encounters, it is not excluded that she will open a North American office in Canada for DollsVilla!"
